

Tokyo Auto Salon 2004

JAN 9-11, 2004

By Makuhari Messe, Tokyo and Randy "Ranzo" Schmidt

OVER THE LAST 20 YEARS, the Tokyo Auto Salon has gained international fame as *THE* place to be for the latest in the import aftermarket. A literal wet dream for the import enthusiast, the Auto Salon now plays host to over a quarter million attendees and 3000-plus vendors. Aftermarket and OE booths showed their stuff with every conceivable kind of modification. This year would also bring a renewed energy for the rotary enthusiast. With the introduction of the RX-8, one would figure that vendors would be working furiously in advance to have their RX-8 creations ready. As well as the RX-8, the RX-7 always makes a strong showing. The rotary is alive and strong as ever:
